Angles

Lee Ranaldo

I caught myself standing in a door today
Wondering how the time has flown
When such a vision rose up, got in the way
Of we two childlike and on our ownLet's turn off all the lights now
Turn on the stars
Keep all the windows open
Hear the steel guitarsAngles casting off the sun at noon
Catch you with a precious fruit
That's the way I'll always remember you
Coming close and closer into viewLet's head across the stateline
Get out and drive
Stand close together in the dark
I feel so aliveSummer rays will still fall on our hair
Shards of sun still thrill our eyes
You're the one who can take me anywhere
I can't say it comes as a surpriseLet's turn off all the lights now
Turn on the stars
The wind is blowing, feel so free
I hear street guitars
