# I'm Taking Off

## Nick Carter

You're just a chemical reaction
A love the galaxies erased
I thought that I was going crazy
You took me to another placeAnother Big Bang explosion
Don't even know who you are
Something about you is changing
You're acting like an alienI think I'll put my space suit on
So I can jump into my rocket
Call ground control
'Cause something's wrongIt-it's your gravity
That's holding on to me
Gotta break free
And take me halfway to the sunCountdown's begun
I'm taking off
Five, four, three, two, one
I'm taking offI keep on sinking in this black hole
Somehow we gotta rise above
No Captain Kirk here to save me
Stuck in this vortex loveAnother Big Bang explosion
Don't even know who you are
'Cause something about you has changed
You're acting like an alienI think I'll put my space suit on
So I can jump into my rocket
Call ground control
'Cause something's wrongIt-it's your gravity
That's holding on to me
Gotta break free
And take me halfway to the sunCountdown's begun
I'm taking off
Five, four, three, two, one
I'm taking offI'm passing by satellites
On the dark side of the moon
I'm moving fast, the speed of light
Just to get away from youSo say goodbye another time
Leaving Venus far behind
I'm on my way back to MarsI think I'll put my space suit on
So I can jump into my rocket
Call ground control
'Cause something's wrongIt-it's your gravity

That's holding on to me
Gotta break free
And take me halfway to the sunCountdown's begun
I'm taking off
Five, four, three, two, one
I'm taking offTaking off, baby
And not coming back
'Cause I'm taking off, baby
And I'm moving fastDestination unknown
Taking off
I'm gonna break away
Yeah, yeah, yeah, yeah
Five, four, three, two, one
