Cloudburst

Oasis

Wake up, there's a new day dawning
I think I'll take a little walk for a while
I need shades 'cos the sun is blinding
And I can see for miles and milesYeah, I can feel the earth beneath me
I lie down we are as one
And they look but they cannot find me
I'm off and heading for the sunIm getting colder, I feel a chill in the air
There's a change in the weather, here it comes again
Now I can feel the rainThe wind that brings on the change is taking me over
The wind that brings on the rain is making me olderDowntown the moon is shining
I'm gonna dress it up in style
My business everybody's minding
I need to get away for a whileIm getting colder, l feel a chill in the air
There's a change in the weather, here it comes again
Now I can feel the rain, yeahThe wind that brings on the change is taking me over
The wind that brings on the rain is making me older
