

# You and Me

## Consumed by Fire

they wanna wrap me up and never let me go  
they wanna let me know they're in control  
they wanna try to make me feel the heat  
you wanna try to pull one over mesee everybody's made wrong turns  
and everybody's crashed and burned  
sometimes we all feel the heat  
sometimes we all even bleedso say what you wanna say to me  
But you ain't the first one to try to change me no  
I've been here before we've been here beforeand this comes down to you and me  
doesn't matter what they say  
we'll fight 'til the day 'til we got it good 'til we got it made  
this comes down to you and me  
doesn't matter what they say  
we'll fight 'til the day 'til we got it good 'til we got it made  
oh 'til we got it madethey say too much and don't think twice  
envision ways to prove their right  
even when I feel the heat  
I know where I've gotta beso say what you wanna say to me  
But you ain't the first one to try to change me no  
I've been here before we've been here beforeand this comes down to you and me  
doesn't matter what they say  
we'll fight 'til the day 'til we got it good 'til we got it made  
this comes down to you and me  
doesn't matter what they say  
we'll fight 'til the day 'til we got it good 'til we got it made  
oh 'til we got it made  
oh 'til got it madehowever it turns out  
however this goes down  
I've been here before we've been here before  
and somehow we're still around  
however it turns out  
however this goes down  
I've been here before we've been here before  
and somehow we're still aroundthis comes down to you and me  
doesn't matter what they say  
we'll fight 'til the day 'til we got it good 'til we got it made  
and this comes down to you and me  
doesn't matter what they say  
we'll fight 'til the day 'til we got it good 'til we got it made

oh 'til we got it made  
oh 'til got it made  
oh 'til we got it made  
this comes down to  
you and me
