Frontier

Richard Bliwas

Sometimes I'm an indian
Caught only by the sky
I can't go further
I'm going inside
See it's like a ride
It turns you out in the night
You're far from the road now
But it's getting brighter
If you don't believe it
Then loose yourself and feel it
This is the bright frontier
Right now, right here
This is the bright frontier
Right now, right here
Taking hold of what we have
It's easy now
We're splitting it open

To eat the seeds
Looking in at what we've found
It's easy now
This big horizon
It's you and me
If you don't believe it
Then loose yourself and feel it
This is the bright frontier
Where the love runs free
This is the bright frontier
The sky is the limit for you and me
When you get to the top of something
Do you get that feeling?
Do you get that high?
When you get to the top of something
Do you get there, you want to jump off?
Oh - we're going to keep on stretching out
We're going to ride on...
