

# A Dream for Us

[Rick Astley](#)

Lately I've been sleeping  
Far too long in bed  
I've been dreaming of you lover  
Oh the things inside my head I don't want to wake up  
I'm scared to break the spell  
Oh I'm sleeping like a baby  
I hope you sleep so well You know I'm hoping, hoping I know there's a dream for us  
I know there's a dream for us  
I know there's a dream for us  
Been on our minds  
I know there's a dream for us  
I know there's a dream for us  
I know there's a dream for us  
We're gonna find I know there's a dream for us  
I believe it's true  
In a word, love you  
And I'm hoping our dream comes true You know I'm hoping, hoping Miracles and moonbeams  
Wishes on a star  
These are things I dream of, I know it sounds bizarre  
I see familiar faces, or is it déjà vu  
The one recurring vision  
Is a dream I have of you You know I'm hoping, hoping I know there's a dream for us  
I know there's a dream for us  
I know there's a dream for us  
Been on our minds  
I know there's a dream for us  
I know there's a dream for us  
I know there's a dream for us  
We're gonna find Come on now baby I know there's a dream for us  
I believe it's true  
In a word, love you  
And I'm hoping our dream comes true When you find someone  
You find someone you love  
You know you can't believe it  
When you find someone  
You know you can't deceive it  
Your love takes you high I know there's a dream for us  
I'm sure there's a dream for us I know there's a dream for us  
I believe it's true

In a word, love you  
And I'm hoping our dream comes true
