

Of the Black

Cancerslug

A wolf in a man
Sick thing that I am
An engine to fuel the kill A new beginning
Your world is ending
So sit back and watch it die The true lords of man
Beasts on hind legs stand
Ready to take our place of dominion A new beginning
Your world is ending
So sit back and watch it die And we have eaten the flesh of the older gods we remind you of
And we've taken all that they have left to give
And we have eaten the flesh of the older gods we remind you of
And we've taken every reason you have to live See the nations fall
Ruled by tooth and claw
This is the old religion A new beginning
Your world is ending
So sit back and watch it die And we have eaten the flesh of the older gods we remind you of
And we've taken all that they have left to give
And we have eaten the flesh of the older gods we remind you of
And we've taken every reason you have to live The final attack
With no turning back
We are the BEASTS OF THE BLACK!
