

Look Away

Stars

Two sides to three stories
Never whine and forget about it this time
If you want what you've already got, Look away Toughen up
Valentines day wasn't meant for my kind anyway
There's no leaving a forever thing, so Look away Take me out to the lake
break it down, and dive into our mistakes
take me in to the fire it's just us even for a little while
there's nothing to say , Look away At 17 your hair was gold
you bet me once, we'd never get this old
nobody tells you that you might one day, look away Through the door I can see the light
I'm not surprised he's always been a good guy
Its a game that we both learn how to play, look away Take me out, to the lake, break it down and dive into our
mistakes
Take me in to the fire, its just us even for a little while,
There's nothing to say, look away Can your first still be your last
a little bit of shame in a mountain of a past
nobody wrote the perfect book on a life without a second look
I won't close the door with all this rain
when there's nobody to blame Take me out, to the lake, break it down and dive into our mistakes
Take me in to the fire, its just us and for a little while,
There's nothing to say, look away Toughen up, Valentines Day wasn't meant for our kind anyway
If you want what you've already got, look away.
