

# Take Me Away

Phillip Phillips

Holding on to what isn't there  
Trying to find my place  
Can anyone see what's really me  
Behind a smile, behind this face  
Broken, struggling, in the dark  
Oh just to stay above  
But the only thing saving me is your love  
Loving you is saving me Won't you take me from the clouds  
buried in grey  
All the colors are mixing in my head  
I can't see which way  
Only see you out of thousands coming my  
way  
You're all I want to see  
All I want to touch and feel in every way Turning in the breeze, never leaving this  
Never hard to understand  
Seems everyone around is free  
It seems like everything just tick-tocks  
away  
Falling with no wings to fly  
Like an angel that's lost her way  
Now the only thing saving me, is your  
love  
Loving you is saving me Won't you take me from the clouds  
buried in grey  
All the colors are mixing in my head  
I can't see which way  
Only see you out of thousands coming my  
way  
You're all I want to see  
All I want to touch and feel in every way Loving you, loving you, is saving me  
Loving you, loving you, is saving me [guitar] You take me away  
In the dark and hide me away  
Saying "I'll hold your head"  
Until you die love, and buried beneath  
your grave  
Hate from inside, burst into flames  
Sin forgive me while I run  
I run, sweet love, take me away Loving you is saving me

Loving you, loving you, is saving me
