Last Night on Earth

Private Line

Where do we go? Do you believe in the place above
Where no-oneÂ´s on his own
What do we need? I just do not know
There are me and you and the empty space outgrown

Days like razors, Nights full of sore
When heaven and earth have closed their doors
I gave you everything with you I spread my wings
This is the last, last night on earth

And I need you
Do you know how it feels to be lonely?
Do you know how it feels to be the only?
This is the last, last night on earth

Like a white fallen snow melt away with the pouring rain
It was too late to explain
The last straw of hope, Let's turn the page
That's all she wrote, It's so hard to go on through these days

I gave you everything with you I spread my wings
This is the last, last night on earth
And I need you
Do you know how it feels to be lonely?

Do you know how it feels to be the only?
This is the last, last night on earth
You gave me everything for you I broke my wings
This is the last, last night on earth
