Great Minds

A Telemetry

not pretty enough
or can't you quite talk the right way
not very tough
or can't you let your family be the prey

I can see - I can see
why were going down the tubes
I'll explain - I'll explain
there's nowhere to run from this deluge

all the great minds
don't even bother don't even try
all the great minds
could make a difference but they won't

not part of the clicks
or do you make to much sense
not armed with tricks
or does the media construct a higher fence

I believe - I believe
the whole world is so out of whack
I'll refrain - I'll refrain
as these blue bloods are on attack

all the great minds
don't even bother don't even try
all the great minds
could make a difference but they won't

hanging on by a thread
hold steady - steady
lingering with such greed
get ready - ready for a crash

all the great minds
don't even bother don't even try
all the great minds
could make a difference but they won't
