

Moonstone

Cat Stevens

Well, first I have to tell you that I'm not insane
And that once I was a famous archaeologist named
Who ran a recent expedition in a distant land
I just happened to passion' my hand in the sand And then I stopped, looked and then I was hooked
I saw a flash, then a sparkle from a moonstone
Then the mist started, started to clear
I saw a face, a face in the moonstone
Then it started to disappear Well, I walked and walked and never talked for many days
And without a friend the desert is a lonely place
I was just about to turn around and make way home
When something told me that I had to see it again And then I stopped, looked and then I was hooked
I saw a flash, then a sparkle from a moonstone
Then the mist started, started to clear
I saw a face, a face in the moonstone
Then it started to disappear Avuray
Avuray
Avuray I saw a flash, then a sparkle from a moonstone
Then the mist started, started to clear
I saw a face, a face in the moonstone
Then it started to disappear
And then it started to disappear
And then it started to disappear
