Be Still and Know

Machine Head

In this struggle
Are we dead or alive?
Freedom is not existence
It's how we survive
Shake our grief
Hold on to belief
It can't enslave us forever
There is relief

No change will be permanent
Our strength enduring bright incandescent

Take a chance before we fall

Backs against the wall

And the sun will rise

Dawn will break through the blackest night

Distant in its glow

This shall pass be still and know

And there's heartache

As we search to connect

Even just for a moment

Pretend we're content

There is love

Know that we are one

We are all in this together

Weather the storm

Look into each other's eyes

Make the connection before it dies

It will all disseminate

As we consummate

And the sun will rise

Dawn will break through the blackest night

Distant in its glow

This shall pass be still and know

[Lead: Demmel, Flynn, Flynn / Demmel]

Is it hopeless?

Will the fear take control?

Don't succumb to the numbing

Sting of defeat

Take this hate

Let the bile stagnate

Hoist the head of Goliath
Bask in its grace
Stars realign in the sky
Glaciers may melt and the oceans rise
Waves will come crashing ashore
But withstand the roar
And the sun will rise
Dawn will break through the blackest night
Distant in its glow
This shall pass be still and know
