Vomited Anal Tract

Carcass

Oral eruption, rectal extroversion
Your vagus implodes as nausea strikes
Savaging your body in terminal retch
Violent spasms and decaying enzymesEngulf your throat as you belch
Intestinal disturbance, your ileum turns inside-out
Your duodenum is thrust up towards your mouth
Your pancreas excretes stale septic pusYour whole digestive system is now a sticky mush
Rectal vomit in your thorax wretch your anal tract
Liquidized esophagus mixes with bloodied excretion
As you pathetically gasp for breathThe stench of hot feces scorch your nose
As you violently vomit to death
Your intestines are rising up towards your throat
Stale bile escaping through your bloodied noseYour colon digested into acidic slush
Your tongue gargling on your dislocated anus
