

# Vomited Anal Tract

## Carcass

Oral eruption, rectal extroversion  
Your vagus implodes as nausea strikes  
Savaging your body in terminal retch  
Violent spasms and decaying enzymesEngulf your throat as you belch  
Intestinal disturbance, your ileum turns inside-out  
Your duodenum is thrust up towards your mouth  
Your pancreas excretes stale septic pusYour whole digestive system is now a sticky mush  
Rectal vomit in your thorax wretch your anal tract  
Liquidized esophagus mixes with bloodied excretion  
As you pathetically gasp for breathThe stench of hot feces scorch your nose  
As you violently vomit to death  
Your intestines are rising up towards your throat  
Stale bile escaping through your bloodied noseYour colon digested into acidic slush  
Your tongue gargling on your dislocated anus
