Uk Jamaican

Tricky

Want it, find it, see it, get it, be rich now or just for get it, earn it, steal it, beg it, buy it, can't stay broke you got to try it*
Dream it, plan it, chance it, risk it, bring your guns, machete, ratchet, load it, lock it, pocket, strap it, on gun, long gun, automatic
Hunt it, search it, time it, find it, while you fence it, while they climb it, breech it, brichet it, reach it, take it, dog is sleep and don't you wake it
Have it, hold it, clench it, hide it, the cops sold goods and the guns beside it, fence it, raid it, beat it, skate it, oo get caught them cops feel jaded
Earn it, check it, stop, inspect it, look whose here can stab or beck it, knob it, cough it, jeep it, truck it, putting on stunt people can't flip off it
Freeze it, please it, cock it, squeeze it, puncture brain nobody needs it, truck it, trace it, pick it, waste it, gunshot for your face and space it
Chop it, bash it, smash it, scrape it, try you may but can't escape it, rise it, gage it, pass it, blaze it, cop's head gone a bullet shave it
Shoot to kill it, mute it, steal it, got one life you can't reveal it, know it, pre it, saw it, fleet it, logic, laws, and rules we wrote it
Chems for logic, chems for logic, chems for logic,

Chems for logic, chems for logic, chems for logic,
Chems for logic, chems for logic, chems for logic,
Chems for logic, chems for logic, chems for logic,
Chems for logic, chems for logic, chems for logic,
Chems for logic
Don't take it keep it too long it's not a fucking love song, eat your words, its fictional you got my money and the cars got the gun avoid the boss, time to kill, it's will I still,
You confess, you got your bullets in your vest keep it moving, move away smoke my cokes you former player you confess, you got your bullets in your vest keep it moving, move away smoke my cokes you former player your such a bird keeps your word, turn to dust, I corrode, and then I rust
Chems for logic, chems for logic, chems for logic, chems for logic, chems for logic, chems for logic, chems for logic, chems for logic
