

# Dissolve And Decay

## Hawthorne Heights

She wore crushed velvet  
Jet black and to the floor  
She rode gods angels wings  
That peers to shine oh so bright  
Now the dark has gone this far  
In her eyes that die  
I can't find you

I'll wait for you I cross my heart  
Dissolve and decay there's nothing left for me (right now)  
Walk slowly towards  
the lights

She calling still falling, down  
She crying (shes crying) and dying, lying  
About last night

She can't find a way to tell me I can't find you

I'll wait for you I cross my heart  
Dissolve and decay there's nothing left for me (right now)  
This fires dying down there's nothing left to take (right now)  
Dissolve and decay there's nothing left for me  
(sit back and let her die slowly, don't cry, she didn't love you anyway)

Dissolve and decay there's nothing left for me  
(just try to make it out alive your blood bleeds, your blood is flowing)(right now) dissolve and decay there's  
nothing left for me  
(right now) this fires dying down there's nothing left to take
