Kiss the Screen

Nite Jewel

i can't look away
the images of him
i scroll through the scenes and i watch
i found out where to see
all his favorite things like moviesand how will he ever know
and how will i ever show
the love that's in me
when i'm kissing the screen? oh
and maybe i will figure out
just a way to show him how
the love that's in me
when i'm kissing the screen ohand when i take you out with me
you're just a handheld fantasyi lay wide awake
wondering what i should have said
i type out the words to be read
i know i'll never send
so i kiss the screen instead
