Flame

Bell X1

When your hand brushed against mine, I thought I'd collapse
I'm no rolling stone, I gather too much moss
Maybe it's 'cos I'm gettin' a little bit older
But oh, how your neck flows to your shoulder
It draws me, it draws me to your flameI wanna be near you and blink in your light
And toast marshmallows on a cold dark night
(By your flame)
I wanna be near you and blink in your light
And toast marshmallows on a cold dark nightYour flesh it melts in my mouth like Holy Communion
But you don't really care for Jesus now do you?
A photograph of this love hangs on my wall
I would dare to speak its name, if I knew what it was called
I would dare to speak its name, if I knew what it was calledRattle the one whose shadow you're standin' in
Under the branches after it's been rainin'
(By your flame)
Rattle the one whose shadow you're standin' in
Under the branches after it's been rainin'
(By your flame)I wanna be near you and blink in your light
And toast marshmallows on a cold dark night
(By your flame)
I wanna be near you and blink in your light
And toast marshmallows on a cold dark nightYou brought your flame into the chambers of my heart
(Flame)
You brought your flame where all's been condemned to dark
(Flame)
And now your flame spits shadows on my walls
(Flame)
Spits shadows on my walls(Flame)
Rattle the one whose shadow you're standin' in
Under the branches after it's been rainin'
(By your flame)
Rattle the one whose shadow you're standin' in
Under the branches after it's been rainin'
(By your flame)Rattle the one whose shadow you're standin' in
Under the branches after it's been rainin'
(By your flame)
Rattle the one whose shadow you're standin' in
Under the branches after it's been rainin'
(By your flame)I wanna be near you and blink in your light

And toast marshmallows on a cold dark night
(By your flame)
I wanna be near you and blink in your light
And toast marshmallows on a cold dark night
(By your flame)I wanna be near you and blink in your light
And toast marshmallows on a cold dark night
I wanna be near you and blink in your light
And toast marshmallows on a cold dark night
