

# We Won't Break

## Zoot Woman

Take me far away, far away  
Take us both today before we break  
Forever changing faces  
Whatever gets you free  
I just can't go on with this uncertainty  
What will bring us face to face  
What in me would you replace  
If I could find you, show you I believe  
Take me far away, far away  
Take us both today before we break  
Take me far away  
Need a change to make all I need to say  
We won't break  
Forever need your promise  
You won't let me down  
Want you in my life but now you can't be found  
Wish you knew how hard I've tried to be near you all the time  
I guess you'll forget but you won't forgive  
Take me far away, far away  
Take us both today before we break  
Listen to the sound  
Everyone around  
The future underground  
We won't break
