Rhythms

Angela Lidin

Mad in a way but I don't say it's what you're used to
Got the words that can convey
I know you'll turn it all around
It's the rhythms that you go throughGet it back and you're not obliged to say
Not in tact but you're better off anyways
Somehow it's never up to me what if I would saySimple words I can't relate
I don't place upon your view
It's the rhythms that you go throughI know what I want
You just take me through the motions
I know what I want
And that's more than I can saySince you found me out
Since you found me out
Since you found me out
Since you found me outYour story still remains
It's so unlike you still you stay the same
And all the while you're counting on your day to come
But nothing ever told youYou would say that it's only for a day
Yesterday's last week tomorrows on it's way
And I'm falling faster all the timeWhat if I would say
Simple words I can't relate
What came is easy is to late
And it was always standing right in front of meI know what I want
You just take me through the motions
I know what I want
And that's more than you can sayAll the time you thought worth saving
You still end up with memories fading
After all that you wouldn't do it makes no sense
But it's the rhythms that you go throughI know what I want
You just take me through the motions
I know what I want
And that's more than you can sayI know what I want
You just take me through the motions
I know what I want
And that's more than you can saySince you found me out
Since you found me out
Since you found me out
Since you found me out
