

# Wish You Were on It

## Florida Georgia Line

In your cup holder with some loose change  
He got your cell phone on vibrate  
I wish you were on it  
There's a road you gotta take to get to my place  
Faded double yellow lines on a two lane  
I wish you were on it I could use a little you right now  
Rushing over, running into my house  
With want you back tears rolling down your face  
Drop your keys on my hardwood floor  
Kiss me like you never kissed me before  
And girl I swear that's all that it would take  
And you know the way  
I wish you were on it  
Wish you were on it  
Wish you were on it There's a parking spot under the sycamore  
And a floodline on the front porch  
I wish you were on it  
Through the front door, up the staircase  
There's a (!) down the hallway  
I wish you were on it I could use a little you right now  
Rushing over, running into my house  
With want you back tears rolling down your face  
Drop your keys on my hardwood floor  
Kiss me like you never kissed me before  
And girl I swear that's all that it would take  
And you know the way  
I wish you were on it There's a heart that needs to unbreak  
And you know the way could use a little you right now  
Rushing over, running into my house  
With want you back tears rolling down your face  
Drop your keys on my hardwood floor  
Kiss me like you never kissed me before  
And girl I swear that's all that it would take  
And you know the way  
I wish you were on it  
Wish you were on it  
Wish you were on it
