

# Time Moves Slowly

## Kero One

(feat. The Tones)

Time time time, keeps on slipping away  
And my mind mind mind, keeps on tripping everyday

Time moves slowly, time moves quick  
I never really thought life would move like this  
Time moves slowly, time moves quick  
As the clock goes tock a gun goes click

Time moves slowly, time moves quick  
I never really thought life would move like this  
Time moves slowly, time moves quick  
Tock tick gun click

With 24 hours 365 days  
That doesn't leave me much time to get this pay  
But maybe just enough days to pave the way  
For youth trapped in a maze in pursuit of the grave  
But some days, I'll lose vision with my decisions  
Living selfish, helpless as intuitions imprisoned  
Cuz really I'd like to show more love to those who raised me  
But the scale often tips up to rolling with my lady  
Or maybe, I'd rather spend time with friends instead  
Raising a glass to the good life ahead  
As we're caught in a loop tryna cop that lexus coupe  
Others are walking in gangs wondering whose next to shoot  
Or battling obesity, shaving their every calorie  
While third world kids scrounge food to avoid casualty  
It saddens me but somehow I keep on  
Counting down the minutes 'till the day we gone...

Time moves slowly, time moves quick  
I never really thought life would move like this  
Time moves slowly, time moves quick  
As the clock goes tock a gun goes click

Time moves slowly, time moves quick  
I never really thought life would move like this  
Time moves slowly, time moves quick

Tock tick gun click

As the clock keeps ticking and the gears turn and years blur  
And the fears turn into sorrows  
And the heart keeps sinking, the tears turn into a river  
Deep enough to drown out tomorrow  
It makes it harder today, harder to say  
How I feel in a world that ain't real  
It makes it harder to move, harder to prove  
Who you are, and they still can't tell?  
It's true we are aloof to views and the signs  
Abusing in a bind, confused and blind  
I see we are living in confusing times  
So in order to gain my soul, I had to lose my mind  
I'm far from perfect, in fact I'm part of the blame  
But I can wallow in vein or I can hollar his name  
So as the bullets fly, I'mma look into the sky  
And never ever let em pull the wool over my eyes

Time moves slowly, time moves quick  
I never really thought life would move like this  
Time moves slowly, time moves quick  
As the clock goes tock a gun goes click

Time moves slowly, time moves quick  
I never really thought life would move like this  
Time moves slowly, time moves quick  
Tock tick gun click

We working hard so we can earn a bigger figure  
This is our theme music and my life's a motion picture  
Waiting with their hands out searching for the litter  
I'm coming from a city where they sabotaging jiggers  
Women come around 'cause they think ya dudes ballin'  
Spending at the club when I know that I ain't got it  
Shed it just to make it and start out fresh Again  
The sticky stays around so you can see it in the air  
Distraction is the only thing in Life that isn't rare  
And you can walk it out like what's his face, pretend you don't care  
But I'm a realist, so if you know me than you know it  
I ain't that sensitive I crush my opponents  
Cause time is of the essence and real gods know it  
If you want the same stuff don't say it dog show it  
We spit bars that Cloud up like skies

The reason we rhyme, We reign hard on you guys..time

Time moves slowly, time moves quick  
I never really thought life would move like this  
Time moves slowly, time moves quick  
As the clock goes tock a gun goes click

Time moves slowly, time moves quick  
I never really thought life would move like this  
Time moves slowly, time moves quick  
Tock tick gun click
