

Too Much

I LOVE MAKONNEN

[Hook x2]

You've been fronting on us hard too much
You always talking about these broads too much

You steady keep confusin' us too much
You always keep losing us too much[Verse]

I don't need your love haunting me
I have enough fucking demons stalking me
You say way too much when there's no need

Then say how I shouldn't speak

Promises you couldn't keep

Falling again on your knees

Screaming towards heaven's feet

Asking for another me[Hook x2][Verse]

I'm still doing me from start to jump

It's like all they do is complain to us

Can you save my soul from this heat?

The cold takes a toll on my street

Living day and night to smoke my weed

People outside keep calling me

I'm not ready for love involving me

I've been ready for us to travel the sea
