Together

Sammy Johnson

We've got a long long history
I remember when it was you and me
We'd stay all night on the phone
And talk about love and if we find that one
Battles I beat them one by one
Hoping that you boo were the one
Baby I should just tell you
Maybe I think I won
What if I tell you and you don't feel the same about meCause you and me, We go together like a harmony
Because you and me, We go together like a honey and a beeI know that you and me we're meant to be together
I know that you and me we're meant to stay forever
Cause baby I love you (I love you), and you love me (and you love me)
So let's stop pretending like we weren't meant to be
Cause I know that you and me we're meant to be together
I know you and me, we're meant to be-e together
I know you and me, we're meant to be-e togetherOh, I've never really given my heart before
But now that I met you I want to give you even more
More of my heart, more of my time
More of the things that you've been dreamin' all your life
Strollin' everyday when you're with me, I'll give all my time just to please the
Just like we did before then, but we were only friends
Who would've thought you'd be my lover and my best friendCause you and me, We go together like a harmony
Because you and me, We go together like a honey and a beeI know that you and me we're meant to be together
I know that you and me we're meant to stay forever
Cause baby I love you (I love you), and you love me (and you love me)
So let's stop pretending like we weren't meant to be
Cause I know that you and me we're meant to be together
I know you and me, we're meant to be-e together
I know you and me, we're meant to be-e togetherOh, I guess I'll never never know
If I never tell you so
That I love you and want you and need you to understand
That I don't want to be nothin' but your manI know that you and me we're meant to be together
I know that you and me we're meant to stay forever
Cause baby I love you (I love you), and you love me (and you love me)
So let's stop pretending like we weren't meant to be
Cause I know that you and me we're meant to be together
I know you and me, we're meant to be-e together
I know you and me, we're meant to be-e together
