Escape

Hoobastank

Like other day goes without any change
The feeling we live with still remains
We're stuck in a hole and we're searching for anything to hold onto
There has to be somewhere that we can be safe
From the lives we live each day
There has to be somewhere that we can be far away
We have to escape and I will go anywhere if you just lead the way
Escape to a place where we'll be together, together everyday
We have to escape
We could be living how we wanted to
Instead of doing things we're forced to do
With no one to tell us that we should be going through
What they went through
There has to be someplace that nobody knows
Somewhere we can only go
There has to be someplace that we can be all alone
We have to escape and I will go anywhere if you just lead the way
Escape to a place where we'll be together, together everyday
We have to escape and I will go anywhere if you just lead the way
Escape to a place where we'll be together, together everyday
Together everyday, oh yeah
We have to escape
We have to escape
We have to escape and I will go anywhere if you just lead the way
Escape to a place where we'll be together, together everyday
We have to escape and I will go anywhere if you just lead the way
Escape to a place where we'll be together, together everyday
We have to escape
