## **Object**

## The Cure

You know you turn me on Eyes so wide and legs so long But don't try to talk to me I won't listen to your lies You're just an object in my eyes You're just an object in my eyesSophisticated smile You seduce in such fine style But don't try to fool me Because I can see through your disguise You're just an object in my eyes You're just an object in my eyesBut I don't mind Just don't care I've got no objection To you touching meObject, object Object, object Object, object Object, objectYou know just what to do Lick your lips and I want you But don't try to hold me Because I don't want any ties You're just an object in my eyes You're just an object in my eyesBut I don't mind Now, I just don't care I've got no objections To you touching meYou're just an object, object You're just an object, object You're just an object, object You're just an object, objectObject, object Object, object You're just an object, object
