

With Your Love

Donna Summer

Lay your love all over me
Fill me to the top
If only you can set me free With your love, your love, your love
With your love, your love, your love Got to cool this fire
Make this burning stop
You can take me higher With your love, your love, your love
With your love, your love, your love Love
(With your love, with your love, with your love)
Love
(With your love, with your love, with your love) Love
(With your love, with your love, with your love)
Love
(With your love, with your love, with your love) Won't you come to me tonight?
Open up my door
Come and fill the night with light With your love, your love, your love
With your love, your love, your love Since you came into my life
I'm feeling so complete
You made a woman out of me With your love, your love, your love
With your love, your love, your love Since you came into my life
I'm feeling so complete
You made a woman out of me With your love, your love, your love
With your love, your love, your love Won't you come to me tonight?
Open up my door
Come and fill my night with light With your love, your love, your love
With your love, your love, your love Love
(With your love, with your love, with your love)
Love
(With your love, with your love, with your love) Love
(With your love, with your love, with your love)
Love
(With your love, with your love, with your love) Love
(With your love, with your love, with your love)
Love
(With your love, with your love, with your love)
