Good To You

Medina

Say I don't want it, I don't need it.
But you and I both know, that I'm staying
When I say I'm leaving cause with you I feel home.
Not sure why you keep believing, even when I'm so cold and I,
Don't see, how you can even find the strength to love me more.Cause every little time your hands touch my hands
You know what I wanna do and every time you come around
I'm asking myself how can I be good to you,
How can I be good to you.
Be good to you, like you good to me.
What you do, is good to me, so good to me.
I'll be good to you, like you want me to, like you want me to,
Like you want me to, like you want me to.I was looking for a reason for me to quit and go, but I,
I can say what I was thinking when you and I both know.
Know that when you're around me baby with you I'm so exposed,
And I got myself together finally, no I'm not gonna let go.Cause every little time your lips touch my lips,
You know what I wanna do and every time you come around
I'm asking myself how can I be good to you, how can I be good to you.
Be good to you, like you good to me.
What you do, is good to me, so good to me.
I'll be good to you, like you want me to, like you want me to,
Like you want me to, like you want me to, like you want me to.Every time you turn your back just wanna see your face,
Every time we're arguing want it to be erased.
Every time I need you here you're there in every way,
You're there in every way.
Every time you turn your back just wanna see your face,
Every time we're arguing want it to be erased.
Every time I need you here you're there in every way,
You're there in every way.And what you do, is good to me, so good to me. I'll be good to you.
What you do, is good to me, so good to me, I'll be good to you,
Like you want me to, like you want me to.I was looking for a reason for me to quit and go.
