

Machine

Violent Femmes

I got a machine
And I took over the world
In one weekend
I took over the world
With my machine
I did it because I was looking for a project
And it was either take over the world
Or learn French
So I took over the world
And next weekend I can learn French

I got a machine
And I took over the world
But nothing changed
I got a machine
And I took over the world
But nothing changed
That wouldn't be fair
