

New Wife, New Life

Starflyer 59

Talk strays when you're right
So drive straight when you drive
Does it finish off that season
And the finish of that life? To get what you always want
To get another try
To find that party
You break all your family ties New wife, new life
Chest pains when you lie
So talk strays when you try To get what you always want
To get another try
To find that party
You break all your family ties New wife, new life
