

I Can Make It

Take That

I'm tired of closing my eyes, to picture you in my mind
It feels so cold to be alone
Not sure where I want to be, so close to finding my dream
We need to hold on to all the times we spoke of love
Now I pray to God above that someday I can find the door
I'm looking for I can make it, I know I can
I can save this love forever
I can make I know I can
We can make this work together It's not a lonely man's dream, it's just that now that there's been
A taste of love in my life
That I refuse to return, I've got so much to learn
How can it feel as though I've reached the top of this steep hill
For a moment I was standing still
Now I have the faith I've needed to believe 'Cause you know what this love means to me
You know how it feels when I can see it in your face
That you're missing me now, you feel I've let you down
You've gotta hold on, you've gotta reach out and believe
