If This Is It

Newton Faulkner

No one move no one speak please don't say that its just me its not just me and even though I wont forget just don't want this to end just yet not just yet But if I had one chance to freeze time and stand still and soak in everything I'd choose right now if I had on night where sunshine Could break through and show you everything I'd choose right now If this is it all we have I know I've done all I can if this is it and we cant stop and start again we cant fast forward to the end this is it But if I had one chance to freeze time and stand still and soak in everything id choose right now if I had one night where sunshine Could break through and show you everything id choose right now before the fears that I once had start coming back And I can take the sticks (or slings) and stones and fire Because I know you make it all worthwhile And every time I focus over oh (or, and every time I fall cause its over) You know this crowd can drag me up again And again oh please come back again oh please come back again And I'm so scared

I might forget Just don't want this to end just yet Not just yet But if I had one chance to freeze time and stand still and soak in everything id choose right now if I had on night where sunshine Could break through and show you everything id choose right now Before the fears that I once had start coming back Again
