Scars (The Echo Song)

Element Eighty

You said that we would always be friends
You said our love would never end
But all you gave to me were scars on my heart
All you did to me was tear my world apart
You left these scars on my heartYou took my love and made it bend
And you knew my money was for you to spend
You stabbed my heart and tore my world apart
and all you left me with were scars on my heartScars on my heart
These scars on my heart
Scars on my heart
Scars on my heartYou took my love way past the line
You took this broken heart and you made it mine
But I don't need your sympathy
No I don't need one damn thingYou left these scars on my heart
Scars on my heart
Scars on my heart
Scars on my heartAnd now I'm scarred
And now I'm scarred foreverYou said that we would always be friends
You said our love would never end
All you gave to me were scars on my heart
And all you did to me was tear my world apartScars on my heart
These scars on my heart
Scars on my heart
Scars on my heartDon't make meAnd now I'm scarred
And now I'm scarred
And now I'm scarred foreverScarred
