

# Black Rain

Ben Harper

You left them swimming for their lives  
Down in new orleans  
Can't afford a gallon of gasoline  
With your useless degrees  
And your contrary statistics  
This government business  
Is straight up sadistic

It's a black rain, it's a black rain  
Is gonna fall

You don't fight for us  
But expect us to die for you  
You have no sympathy for us  
Still i cry for you  
You may kill the revolutionary  
But the revolution you can never bury

It won't be long till the people flood the streets  
And take you down  
One and all

It's a black rain, it's a black rain  
Is gonna fall

Don't you dare speak to us  
Like we work for you  
Selling false hope like some new dope  
We're addicted to

I'm not a desperate man  
But these are desperate times at hand  
This generation is beyond your command

It won't be long till the people flood the streets  
And take you down  
One and all

It's a black rain, it's a black rain  
Is gonna fall
