

By The Way

Vices I Admire

Really then? Are we lost, where we stand no x for our spot, believe in your feet, move an inch, move the earth,
move an inch, move the skyAnd look to your arms, a strength, your breath, a life, your will to live, and still
you're by the way, you know.No demon, no daughter, no mother, no father, got theirs by the way
No demon, no daughter, no mother, no father forgetsReally then? Are we grown? Has the future begun to
reflect? Be the wrong side of hate, be the wrong side of fate, be the "re" in regret.
And look to your arms, a strength, your breath, a life, your will to live, and still you're by the way, you know.
No demon, no daughter, no mother, no father, got theirs by the way
No demon, no daughter, no mother, no father forgetsRiddle, where we're on, all you were that you were was it
all just a lie?
Riddle, turn this off, all you were that you were, was it all just a lie?All this same, that you were, it won't bother
me anymore
All this same, that you were, it won't bother me anymoreAnymore, yeah right.
