

# Great Big Storm

Nate Ruess

Because we're  
Holding our own in a great big storm  
It's a great big storm and we're holding our own  
Holding our own in a great big storm  
It's a great big storm and we're holding our own I've been lost in this maze  
Losing love, losing friends  
Losing faith in chemicals  
Afraid one day you'll find me  
Asleep above the stars  
I watch my mother cry  
Father Time is catching up  
I keep the phone by my side  
Afraid she'll wake me up to catch the next flight  
In time to say goodbye But sometimes I fall asleep at night  
To the TV light and it sings  
Oh ooo whoa oh  
One day the sun will break into the room Because we're holding our own in a great big storm  
And though we're cutting it close  
We won't let go  
Oh no I can't believe  
Everything falling down around me  
But now we're holding our own  
And won't let go  
Holding our own in a great big storm  
It's a great big storm and we're holding our own  
Holding our own in a great big storm  
It's a great big storm and we're holding our own Broken hearts broken homes and broken bones  
Secret love let me go  
You know I gotta find my own way  
Through mistakes that I can't change  
Because there's beauty in every sin  
Every single black eye  
Has some blue like the moon just before the sun shines  
No I don't believe in all the things that they preach But sometimes I fall asleep at night  
And I just know you're smiling at me  
Oh ooo whoa oh  
One day I'm gonna make this up to you Because we're holding our own in a great big storm  
And though we're cutting it close  
We won't let go

Oh no I can't believe  
Everything falling down around me  
But now we're holding our own  
And won't let go  
Holding our own in a great big storm  
It's a great big storm and we're holding our own  
Holding our own in a great big storm  
It's a great big storm and we're holding our own I can't stand myself  
And all the curse words that fall from my mouth  
I can't stand myself  
Or my legs as they run from the ones here to help  
But I just woke up with you next to me  
Some new air to breathe  
And a belief that it's all gonna be alright  
I can't stand myself  
But it's high time that we gave it a try  
And I think I'm gonna finally give myself a new try Because I'm holding our own in a great big storm  
And though we're cutting it close  
We won't let go  
Oh no I can't believe  
Everything falling down around me  
But now we're holding our own  
And won't let go
