

# Give It Up

## Fishbone

Are you getting tired of all the ravages of war?  
Aren't you even sure what the hell you're fighting for?  
All the broken dreams of men just break me down to pray  
For peace and understanding, we just can't go on this way

    All together free  
    All together free united  
    All humanity  
    All together free united  
        Give it up  
        Give it up  
        Give it up  
        Give it up

All the lies are broken all the truth is still the same  
All the love and hatred in a world that lives in pain  
Will we see the winds of time erode this curse away  
[Incomprehensible], we just can't go on this way

    All together free  
    All together free united  
    All humanity  
    All together free united  
        Give it up  
        Give it up  
        Give it up  
        Give it up

We live for Mother Country but we live for Mother Need  
We're looking for the other side but we're here to burn and bleed  
We all know the righteous, the truth shall lead the way  
But we all know the darkness so believe me when I say

    All together free  
    All together free united  
    Every nation free  
    All together free united  
        Give it up  
        Give it up  
        Give it up  
        Give it up

    All together free  
    All together free united  
    All together, all together, all together

All together free  
All together free united  
All together, all together free  
    Give it up  
    Give it up  
All together free
