

Telepath

Leo Sayer

I'm leaving the smog below me now
I'm leaving my troubles on the ground
I'm watching those smoke stacks just blaze away
The sky will be blue never grey The future is filled with wasted time
I can't see the road I'm going blind
I'm laughing on all of my future plans
Shining like gold in my hand Isn't it funny how you reach me
You know exactly what I'm thinking
You're always helping me from sinking
It's your way Hello, this is London calling
Is my flight due
Hello, is there someway
I can reach you Isn't it funny when you call me
You call me up while I'm sleeping
You're always helping me from sinking
It's your way Now this is the end of all my dreams
The drumming has stopped behind my ears
There's no looking back 'cos I'm too far away
Shaking like mad in the daze Then out of the night you join me here
The people around me, they disappear
And I hear your voice and you speak to my eyes
And everything comes alive Isn't it funny how you read me
You know exactly what I'm thinking
You're always helping me from sinking
It's your own way, it's your way, it's your way Hello, this is London calling
Is my flight due
Hello, is there someway
I can reach you Oh, I said hello, hello, this is London calling
Is my flight due
Is there someway, maybe
I can reach you Isn't it funny how you reach me
You call me up when I am sleeping
You're always helping me from sinking
It's your way, it's your way
It's your way, it's your way
