

Made Out Of Nothing (All That I Am)

Coheed and Cambria

Nevermind all the lines, I'm coming
And there is no better part of me you'll see
The darkest light the blind I'll be
I accept that you chose to forget
The horrid thing you made of me, my dear
It is alright, it is soThe laughing feels so good
But the world misunderstood all I said,
There was no joke in what I meantSomeone please come shelter me from
All that I am and never again
Will I believe the same old story
Someone please come shelter me from
All that I am and never again
Will I believe the same old storyI've given up on all I loved for
An honest moment of clarity
Well I need to feel alright, please let me breathe
In a life I'm made out of nothing
To cleanse this useless identity
Will you hear all the world in it's whys?
Just wait,Will the later half be as good?
Well if only I misunderstood
I'll weight all this judgment I've been blamedSomeone please come shelter me from
All that I am and never again
Will I believe the same old story
Someone please come shelter me from
All that I am and never again
Will I believe the same old storyI failed you, I fail
There's no understanding in miracles
When the worst, it always comes true
Ha-ha, I am the nothing you have savedSomeone please come shelter me from
All that I am and never again
Will I believe the same old story
Someone please come shelter me from
All that I am and never again
Will I believe the same old storyIt eats us like cancer, we're hoping for something
Maybe an answer with all that you've done for me
I'll give you nothing
It eats us like cancer, we're hoping for something
Maybe an answer with all that you've done for me
Made out of nothingMade out of nothing

Made out of nothing
Made out of nothing
Made out of nothing
Made out of nothing
Made out of nothing
Made out of nothing
Made out of nothing
