

# Chemical

Ariana Gillis

You know all the heat that's running through the city  
You know the cold that drove us underground  
And the things that we were told  
To make us go away  
Nothing changed, it stayed the same

You know the gloves you bought to make sure my hands were warm  
Don't much wear 'em anymore  
The earth is firing up, and the wires we tried to connect  
To make it all ok  
Didn't lighten up their minds

You know the code you set could somehow break the system  
It was real, you said it was  
And that's why I believe  
We all stood there pressing hard  
So that everyone could see, See it all  
For what it is

Chemical display  
Of my feelings for you  
Watch them burst to flames  
As the fumes burn away  
Burn ... away

You know the abandoned basement that we hid in  
We played cards to pass the time  
Until you finished all the plans  
Then you kissed me till it hurt  
Told me over again  
It's almost here, we're almost there

You know the day the clouds grew dark  
As if in warning  
You all walked to the edge of the giant double doors  
And placed the package on the steps  
Looked up at the sky it was loud  
And then it rained

Chemical display

Of my feelings for you  
Watch them burst to flames  
As the fumes burn away  
Burn ... away

SOLO - (ahhh's)

You know I didn't go with you to make a statement  
I lost all of my nerve when I was up late last night  
And I read it in the paper,  
You left to make it right  
Why did you have to pick that fight

Chemical display  
Of my feelings for you  
Watch them burst to flames  
As the fumes burn away  
Burn  
Chemical display  
Of my feelings for you  
Watch them burst to flames  
As the fumes burn away  
Burn ... away
