

Nothing Left

Machine Head

Withered away I see it
Every day complacent
Desecrates the fabric of lies
Emptiness fills inside me
Bitterness has denied me
Faith like this well
Could I really give a shit When I feel it
Come falling
I turn you away I am the things that you fear
My leap of faith without a sound
Don't push my back against the wall
Yes I have strength will never fall, will never Withered inside
This soul has petrified
As concrete fills the skies
This life is disarray
Consequence every action
Brings violence from the passions
Loneliness the emotion withering inside When I feel it
Come falling
I turn you away I am the things that you fear
My leap of faith without a sound
Don't push my back against the wall
Yes I have strength will never fall I feel around the fall is on
For so long I've been away..away
For years to now been holdin' on
For so long I've been away.. away I have nothing left for nobody else
I have nothing left for nobody Feel it
Come falling
I turn you away I am the things that you fear
My leap of faith without a sound
Don't push my back against the wall
Yes I have strength will never fall
