

# It's Quite Alright

[Rancid](#)

i can tell you how it'll go down but only you can tell me how it'll end all systems just stop right here why do we  
always pretend? so many things can be a mystery but all we're seeking is freedom you realize that your reality  
is gonna be there to greet 'em it's all right it's quite all right me let the rich man confess like that man it's hard  
to stop better, get better don't let the deep end drop and if you drop my name in regard to danger i'm urgent  
only to heat 'cause they say live in a world gonna set me free it's all right it's quite all right with me yeah, with  
me!
