

# Still Life

## The Russian Futurists

The still life  
Is all I ever do  
There by the window  
Quietly killed for you  
In this glass house  
My insect life  
Crawling the walls  
Under electric lights  
I'll go (into the night)  
Into the night  
He and I  
Into the night  
Is this still life  
All I'm good for too?  
There by the window  
Quietly killed for you  
And they drive by  
Like insects do

They think they don't know me  
They hired a car for you  
To go (into the night)  
Into the night  
He and I  
Into the night  
And this still life  
Is all I ever do  
There by the window  
Quietly killed for you  
And this still life  
Is all I'm good for too  
There by the window  
Quietly killed for you  
And this still life  
Is all I ever do  
But it's still  
Still life
