

# Closer

## Sugar Ray

Love, can you feel what I feel?  
I feel love and it's all I feel  
I feel love and it feels so real  
It makes time go by But you think that it's over  
And you feel that way  
But it's just something for now  
It's nothing at all Maybe I'm right, maybe I'm wrong  
Making it up as we go along  
Don't run away, we're just getting closer So long  
We've been building a bridge for so long  
It's been fifteen years, it's so long  
But you're still right here by my side So to think that it's over  
How to feel that way  
We can work this out somehow  
It's nothing at all Maybe I'm right, maybe I'm wrong  
Making it up as we go along  
Don't run away, we're just getting closer, yeah They say love like this can never last  
They say all those things that make us laugh  
It's nothing at all, we're just getting closer There's nothing wrong  
There's nothing wrong  
It's been far too long  
It's been far too long to let this slip away Maybe I'm right, maybe I'm wrong  
Making it up as we go along  
Don't run away, we're just getting closer, yeah They say love like this can never last  
They say all those things that make us laugh  
It's nothing at all, we're just getting closer Getting closer, getting closer, getting closer  
Getting closer, getting closer, getting closer  
Getting closer, getting closer, getting closer
