This Place Is Death

Deftones

You arrived
In my dream
Beside me every night
You and me
We explode
Through the scene
We try to drain the night
Empty
No one goes off in every way
Like you do
We got together
We weaved our web
Tangled in the waves
We spray the scene red
We both erupt in colors
And carve out our names
You keep me aroused
I know you feel the same
You arrived
In my dream
Beside me every night
Just you and me
We explode
Through the scene
We try to drain the night
Empty
No one else has a hold over me
Like you do
You open up the covers
You lure me in
Tackle me anxious
Back into bed
Well, I hope to discover
All of your ways
This place is death
I know you feel the same
You arrived
In my dream
Beside me every night

Just you and me
We explode
Through the scene
We try to drain the night
In every way
