

Drive Me (feat. Slash)

State Line Empire

Come off the mountain
Climb down and show me something
Lay down your weapon for me now
Lay down your weapon You're beast of burden
Can't stop the bleeding quickly
Lay down your weapon for me now
Lay down your weapon i've never said you're wrong
Only time will tell me if there's something left
can you hear me?
Drive me into breaking down
But she's burning and ain't messin' round
Calling out to me now
She's driving till the tires are down
Into the fire Bring out your demons
Bring out a fire we can see
We'll light the sky up tonight
We'll light the sky up tonight You drag me under and tear me into pieces
Let it go, let it go one time
Let it go, let it go i never said you're wrong
Only time will tell me if there's something left
can you hear me?
Drive me into breaking down
But she's burning and ain't messin' round
Calling out to me now
She's driving till the tires are down
Into the fire
