

Weather Pattern

[Frazey Ford](#)

Everything is a weather pattern
Everything is a weather pattern
and it flows down to you
and it flows right through you what were you thinking?
what were you thinking? didn't somebody tell you?
that life was all loss. All your friends and your family, your gonna lose
eventually. All your friends and your family, your gonna lose eventually. What were you thinking?
What were you thinking? Didn't somebody tell you? that life was not all loss.
That life was not all loss.
That life was not all loss...
