maJiK

Ohgr

we all believe the magic is in you
'cause there's making the breakfast
and taking out the garbage tooif as it did turning round
right back on through
cause of facing the music
and taking out the garbage toobreath scented fuse locked together ever grim
caused their untimely exit
from each and every little thing
we fly between never close enough to view
causing wrong resolution
crossed border line we're dropping in{ and we
forever never win
silence every witness
ennui
forever never win
the case for existence } x2thieves who stole the show a little left hand path to grow
show the true sympathetic
a mirror magic puppet showand we all believe that the magic is in you
'cause there's facing the music
and taking out the garbage tooand we
forever never win
silence every witness
ennui
forever never win
the case for existence
