

# With You, Tonight

[Matt Wertz](#)

Saturday, six hundred miles  
Lie between the two of us  
And telephones they can't replace  
Me with you face to face  
You gotta tell me it's true you feel the same  
I'm so much better when I say your name  
Let me be with you tonight  
Everything will be just fine  
With you tonight  
Streetlights kissed upon your lips  
My jealous eyes saw it all of it  
Losing sleep, we learned to be

Me with you, you with me  
You gotta tell me it's true you feel the same  
I'm so much better when I say your name  
Let me be with you tonight  
Everything will be just fine  
With you tonight, with you tonight  
Let me be with you tonight  
Everything will be just fine, be just fine  
Let me be with you tonight  
Everything will be just fine, be just fine  
With you tonight, tonight, you tonight
